Microsoft Government Licensing with ScanSource

What is Microsoft Cloud for U.S. Government?

Designed for the U.S. government from the ground up, Microsoft Cloud for Government enables public-sector customers in the United States—from the state and local level—to select from a range of cloud computing services. To best address its customers' specific needs, Microsoft has made significant investment in data centers and is dedicated to meeting compliance with state and local policies, mandates, and requirements.

What is available through ScanSource?

The government plans (Office 365 Government G1, G3, and G5; Microsoft 365 Government G3 and G5) can be licensed to an unlimited number of users and are available for sale in our CASCADE platform. Authorized Microsoft partners in the Cloud Solution Provider Program (CSP) can sell Office 365 Government GCC for CSP subscriptions to qualified customers.
