

HOT OFFERING, HAPPY CUSTOMERS: INTRODUCING OUR HOTWIRELESS DATA PLANS

Your customers are seeking complete solutions—ones that include both Honeywell’s performance-proven hardware and ready-to-implement cellular connectivity. And by leveraging Advantix’s SmartSIM technology with your Honeywell offerings, you can equip them with solutions that connect to the best available cellular network—automatically and easily.

What is SmartSIM?

Advantix’s award-winning, multi-carrier SmartSIM solution pairs any WAN-capable hardware that accepts a SIM card—including Honeywell’s handheld scanners, mobile computers, and tablets—with the best-performing cellular network for persistent connectivity and inherent redundancy. Plus, SmartSIM’s first-of-its-kind EID matching method enables businesses to quickly provision SmartSIM data plans across their entire user base, without any need to purchase and insert physical SIMs.

Among the key features SmartSIM can deliver:

Less hassle

Better coverage

Lower connectivity costs

Superior security

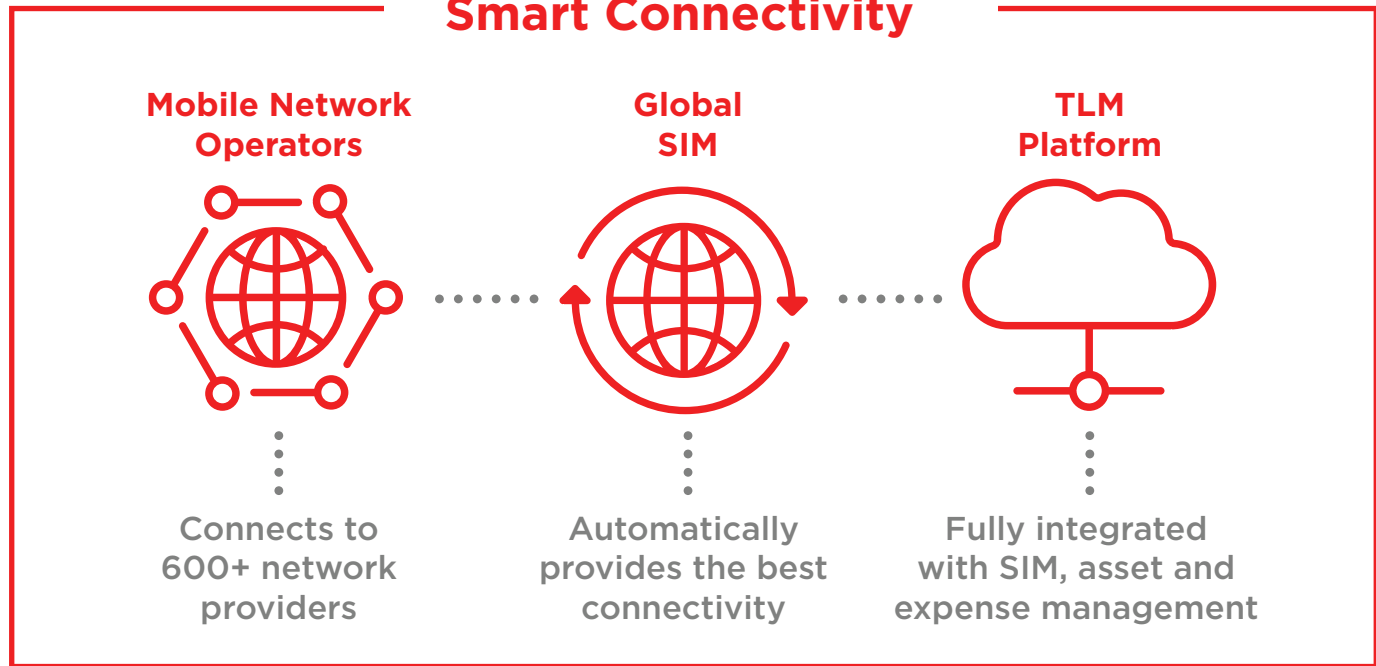

Robust reporting

Easier management

Smart Connectivity

Why Honeywell + Advantix + HotWireless?

The HotWireless program enables Honeywell to complete a channel-centric recurring revenue strategy that covers a growing portfolio of software, services, and security management with the Mobility Edge Android platform.

Compatible Honeywell products include:

CT40 XP

CT60 XP
