BITDEFENDER GRAVITYZONE CLOUD SECURITY BUILT FOR MSPS

Bitdefender understands the importance of saving resources as costs for MSPs. That is why they have developed a single solution that reduces risks, simplifies security management, and streamlines IT flows and operations.

Backed by one of the best providers for protection, the GravityZone Cloud is unified and highly effective for all work platforms.

Bitdefender is running an exclusive promotion in which MSPs will be able to try the GravityZone Cloud free for 60-Days. For more information on how to sign up for a demo or on the product itself, contact your intY account manager today.

Device Control - Whether you are managing virtual or physical desktops, servers, or even mobile devices, enjoy complete control from a single-panel window.

Endpoint Risk Analytics - Improve security postureby reducing customer attack surface, as MSPs will be able to discover and prioritize software misconfigurations.

Exploit Defense - Protect your clients with a solution built to identify and bock specific exploit techniques.

Continuous Process Monitoring - Save resources as Bitdefender Advanced Threat Control constantly monitors customers' running processes for signs of threats with automatic solution deployment built in.

Network Attack Defence - Reduce threats with detection and protection against network attacks.

Content Control - Allow or block for entire web categories from one dashboard.

Optional services that are managed from the same MSP console and use the same agent but will be billed separately include:

Managed detection & response

Full disk encryption

Endpoint detection and response

Email security

Advanced threat security

Security for virtualized environments

Patch management
