What's supposed to happen, happens.

CaptureOne - Desktop Check Scanner

Epson's CaptureOne check scanner features the highest MICR accuracy in its class, high quality scanner that ensures crisp, clear images, electronic endorsements and a double check detector that virtually eliminates double check feeding. It's an ideal solution for both branch back counter capture and RDC applications.

TM-J9000 with TransScan - Scanner and Integrated Printer

Features Check 21-ready TransScan two-sided check imaging, 25-check auto feeder, double check feed sensor, ProofPlus ID card scanner, drop-in validation and two-color printing of logos and marketing messages, all in a small footprint.

TM-H6000III - Multifunction Printer

Offers high-speed receipt printing, drop-in validation for deposit slips, checks, cashier checks and batch tickets, QuickPass check processing (MICR reading, check printing and check endorsement all in one pass), high-resolution graphics, superior slip handling and the highest reliability in its class.

TM-U675 - Compact Multi-station Impact Printer

Ideal for banking environments, this multi-station printer prints slips and receipts, validates and brings big productivity to small spaces.

TM-U325 - Single Station Impact Printer with Validation

This cost-effective validation/receipt printer is designed to meet the high reliability, small footprint needs of the banking industry. This bi-directional printer features multiple-line validation and selectable fonts.
