

## *Hello. How May We Assist YOU?*

Our MCI147 and MCI3100 keyboards are designed to make Telephony software more intuitive while increasing the overall value of the total solution. By eliminating keystrokes, the keyboard speeds processing time with callers and enhances operator efficiency. Reduced training time, enjoyed by a utilizing a custom tailored solution, brings employee productivity levels up to speed quickly. 'Hot Keys' tailored with embedded programming, automate the most common functions of your software package (e.g., wake up call, message, call transfer, schedule appointment). Prefer to use the Num Pad? We can configure the number pad to look and function like a standard telephone pad! Our assortment of colored key caps provide a more professional look and feel and help even the newest user easily locate the required task.

## *Call Centers*

Do you take credit cards over the phone? Consider the dreaded 'card not present' transaction. We've got you covered!

Concerned about PCI? PrehKeyTec can help! We can encrypt data received from any combination of MSR, numeric, alpha, or biometric input.

## *Aggressive Environments*

Our robust keyboards are designed to withstand 'Heavy Fingers' and 30 million keystrokes. A metal base plate keeps our keyboard rigid – even in the most demanding environment.

Got spills? Our keyboards are protected against liquid and dust!
