I AM THE
NCR SELFSERV XK7 ™

The **NCR SelfServ XK7** features an all new innovative and sleek kiosk design with multi-touch capability. The XK7 offers exceptional versatility in an all-in-one design.

Make it even easier for your customers

We understand how important it is to provide an exceptional experience for your shoppers. That's why the NCR SelfServ XK7 delivers the performance you need in a stylish and versatile design that will blend seamlessly in virtually any retail environment. The XK7 offers a projected capacitive touch display providing multi-touch and gesture support to make it easy for shoppers to interact at the kiosk in a way that is most familiar to them in their everyday lives. The kiosk can give your customers access to information, promotions, and lets them purchase items that are out-of-stock or not carried in the store.

Get your customers attention anywhere in the store

The NCR SelfServ XK7 offers a sophisticated, zero bezel design and provides the flexibility to configure a unique kiosk to meet your stores' needs. It's available in either 15", 18.5", or an 21.5" and offers flexible mounting options. Whether it's on a pedestal, tabletop or wall, it fits wherever you need it most and saves space to give you extra room for customer service. You can also customize your solution with integrated options including an encrypted magnetic stripe reader (MSR), fingerprint reader, camera, receipt printer and 2D imaging scanner.

Out of stock? No problem

In today's retail environment, it's a challenge to have the right products in the right store at the right time. Kiosks offer a convenient option to let your customers find and purchase out-of-stock items and have them shipped either to the store or their home, preventing a lost sale to a competitor or to an online retailer. Kiosks can be used by smaller store formats to give shoppers access to a retailer's full assortment, and to recommend coordinating items and accessories, creating the potential for cross-sell and upsell opportunities.

First impressions count

You have just one chance to make a good impression so make sure your kiosk delivers value and convenience for your shoppers the first time they use it.To ensure regular kiosk usage, your solution must provide a clear purpose to the shopper, and it must be reliable and intuitive to use. The XK7's multi-touch capability supports gesture-based interactions, making it familiar to today's shoppers, who are accustomed to using touch-screen applications.

Key features
