

Navigating P2PE

POS Portal provides a truly complete end-to-end solution for Processors, Gateways, or merchant acquirers when it comes to the mandated validation of point-to-point encryption (P2PE), PCI Compliance, and Domain 6 regulations.

Chain of Custody

POS Portal maintains a complete Chain of Custody from Receipt into our facility to Deployment of the POI's to our customers.

Tamper Evident Packaging

POS Portal has built systems to track the chain of custody and has invested in systematic and physical controls including tamper evident packaging to secure configured devices to the merchant's door.

Order Accuracy

POS Portal prides itself on securely encrypting all of our devices accurately. POS Portal has made multiple systematic updates to ensure all orders adhere to standards.

Data Availability for Solution

POS Portal makes transactional data available for Solution Providers to utilize through our REST API. This additional data includes, but is not limited to:

- Order Number
- Device Serial Number
- Tamper Evident Bag Serial Number
- Ship Date/Time
- Chain of Custody Records

Audited by Coalfire

Coalfire is a global leader in cyber risk management and compliance services with over 15 years of experience in payment security.

P2PE Key Generation

POS Portal can generate the encrypted key for each PTS device family in accordance to PCI Requirements. More important, POS Portal is the industry provider authorized for P2PE with every major processor in the United States.

Annual Reporting

POS Portal provides annual reporting to the Solution Provider in compliance with PCI P2PE requirements.

Bi-Coastal State of the Art Facilities

POS Portal has validated both our East and West coast facilities to adhere to strict industry standards. Our facilities are maintained to protect devices and sensitive equipment 24/7 with dual access door control, camera surveillance and limited personnel access.

Ordering and Pricing

Qualifications

POS Portal maintains a complete Chain of Custody from Receipt into our facility to Deployment of the POI's to our customers.

Custom Pricing

Every client has a unique set of needs, therefore every solution is just as unique. A Portal Secure representative will work with you to fully understand your needs and provide pricing that best fits your individual requirements.

Ordering Process

Proprietary Integration

Use POS Portal's REST API to seamlessly enter orders through your company's own proprietary system.

OR

Salesforce Integration

Use POS Portal's Salesforce Integration, either within your own SFDC org or one that POS Portal provisions.

Circular Chain of Custody

Domain 6 Validation

The Domain 6 Validation Requirements are a combination of warehouse processes and system updates that ensure devices used for P2PE have not been tampered with in any way.

"Chain of Custody" refers to required historical information that tracks who has handled a device (when and where) throughout its life—from the point of its arrival to a distribution facility to its confirmed receipt by an authorized merchant representative.
