

Healthcare in the age of technology

Delivering outstanding remote healthcare and supporting virtual collaboration & training

Jabra GN
.....

Outstanding communication tools for everyday healthcare need

Healthcare is moving increasingly online, and the medical sector is facing an unprecedented demand to adapt. The need for outstanding technology solutions that keep patients and healthcare practitioners connected has never been greater.

As you navigate bringing healthcare online, technology has a key role to play in ensuring your provision of these vital services is of a consistently high standard. The right devices help to ensure your practitioners are always connected, both to their patients and to each other.

With 90% of people believing that remote healthcare is as good or better than traditional services, there's never been a better time to ensure that the technology you're using to deliver remote healthcare is the best that it can possibly be.

And that's exactly where Jabra comes in.

With the Jabra portfolio of professional-grade audio and video collaboration tools, you can provide your team with the right equipment to deliver outstanding care. Whether you need high definition, intelligent 180° video technology that shows the whole treatment room or lecture theater; headsets engineered to keep practitioners out in the field connected; or high-performing headsets that deliver world-leading call performance; there's a Jabra product that can help.

With maximum flexibility and portability, plug-and-play functionality for instant connection anywhere, and compatibility with all leading communications platforms, our products are designed to work for you, so you can get on with delivering outstanding care.

Remote healthcare with a human touch

Until very recently, healthcare was always an in-person experience. As remote healthcare increases exponentially, it's changing how patients access these vital services. How can you maintain the human touch that's so integral to doctor-patient care?

There are many different scenarios where patients and doctors need to be able to communicate seamlessly and easily. With the right tools, you can ensure that patients' access to quality care isn't hindered by poor technology.

Doctor-patient consultations

Ensure that patients and doctors can seamlessly communicate, with professional-grade audio and video that ensures no important information is missed.

In-patient monitoring

Keep a virtual eye on in-patients and reduce the strain on your medical staff with remote monitoring.

Mobile medical equipment carts

Equip your mobile carts with flexible, portable communication devices that enable instant, professional-grade communication from anywhere.

Jabra PanaCast

With its unique 180° field of view, PanaCast is the perfect camera for all of your doctor-patient needs. With flexible options for every need, you can be sure that patients always see exactly what they need to, and doctors are able to recreate an in-person healthcare experience virtually.

Jabra Speak 750

The outstanding 2-way premium audio of the Speak 750 makes it the perfect tool for doctor-patient communication, allowing both to speak and be heard simultaneously.

Jabra Evolve2 65

For interactions where a little more privacy is required, for example if the doctor's end of the conversation is at risk of being overheard, you can opt for the world-leading professional-grade audio of our Evolve2 65. Enhanced microphone performance and noise-cancelling microphones ensure outstanding call clarity from anywhere.

Collaboration is key

Delivering outstanding remote healthcare is about so much more than just seeing patients. From treatment rooms to cross medical campus conference suites, as well as education facilities and customer service functions, the right technology can ensure your practitioners and their supporting staff are able to communicate seamlessly and easily when it matters.

For those areas of your practice that require high-quality internal collaboration, Jabra devices are the perfect solution.

Doctor-patient consultations

When your doctors need to seek advice from their peers, the right tools will ensure that every communication is seamless and efficient.

Medical staff meetings

Make your staff meetings run smoothly, with devices that ensure everyone can speak up and be heard, and everyone is included in the picture.

Ongoing medical education

Learning never stops, and doctors need to top up their skills throughout their careers. With Jabra devices, they can do this from anywhere.

Staff training

Rolling out new systems and processes, or simply onboarding new employees, can be done entirely remotely with the right tools.

Jabra PanaCast

The Jabra PanaCast is a professional videoconferencing camera that creates a full 180° view of the room. This unique view allows it to capture more of what's happening, making it the perfect choice for online learning, and enabling socially distanced staff meetings, with multiple people in the room and others dialing in remotely.

It's small and portable, making it easily movable between locations for maximum flexibility. And with plug-and-play capability, and compatibility with all leading communications platforms, it's ready to slot right into your ecosystem and work for you from the moment you unbox it.

Jabra Speak 750

The Jabra Speak 750 is a professional, portable speakerphone that delivers premium, 2-way audio. So everyone on a call can speak and be heard at the same time, making meetings more efficient and ensuring nobody misses any vital information.

With options for both wired and wireless use, this little speakerphone is extremely flexible, delivering outstanding call quality from anywhere. You can even pair two devices together to extend their coverage, making them suitable even for larger spaces like lecture halls.
