

Boost accuracy and efficiency

The rise of eCommerce giants means consumers expect faster deliveries and near-perfect accuracy. Voice automation, usually reserved for larger businesses, now is spiking among small-to-medium distribution centers, according to ScanSource's Brenda McCurry.

AUTOMATION IS KEY

PROCESS THE FUTURE

Watch this webinar from Kyle DeWitt, ScanSource VP, Technical Services, to learn how new technologies are changing the manufacturing, warehouse, and logistics landscapes.

SEE THE FUTURE

**ELIMINATE PAIN POINTS WITH PREDICTABLE
WIRELESS**

Aruba Wi-Fi helps warehouse and manufacturing customers achieve the following goals: improved voice and wireless communications; reliable roaming for wireless devices; and fast, secure, real-time inventory/asset tracking.

PAINLESS WI-FI

**ADD EFFICIENCY, REDUCE COST ANYTIME,
ANYWHERE**

Cascades Paper Products saved millions through new capabilities that allow easier communication and collaboration. Whether in the office, traveling, or at home, log into only one system to call by traditional phone, softphone, or mobile device.

TACKLE THE TOUGHEST, NOISIEST WAREHOUSES

To meet customer demand, and attract and retain qualified workers, organizations must ensure they have the best solutions in place to maintain worker safety and drive productivity. Wearable technology that enables users to pick faster and more accurately not only helps increase worker motivation; it frees up eyes and hands, enabling employees to achieve more.

SOLUTIONS THAT WORK

**UNLEASH THE TRUE POWER OF WIRELESS
WITH 5G**

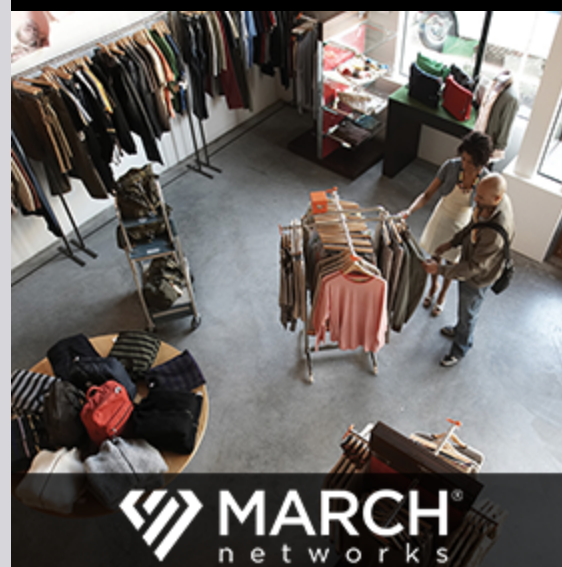

To stay competitive, manufacturing must implement lean and efficient operations to grow and protect profitability, and drive automation improvements by leveraging tech innovations like remote tool connectivity and mobility.

TRUE COLLABORATION

CHECK OUT FIVE WAYS TO IMPROVE ACCURACY

Accuracy is among the most important issues facing medium DCs, occupying two of the top 12 metrics for 2018 per WERC—including inventory-count and order-picking accuracy by location. Honeywell helps identify and overcome these issues.

ACCURACY STARTS HERE

INVESTIGATE LOSSES WITH RFID + HD SURVEILLANCE

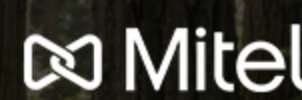

Intelligent solutions let you see your inventory with just a few clicks. By combining data from RFID with high-def surveillance video, you can track and manage inventory more effectively and gain new business insights.

COMBINE RFID + HD

DELIVER BETTER COLLAB BY UPDATING OLD PBX

With dozens of locations, SPI faced some huge communication challenges. Learn how seamless collaboration is crucial to maximizing productivity, maintaining an outstanding CX, and ensuring safety during emergencies.

GO SEAMLESS

CONDUCT A MOBILE-DEVICE HEALTH CHECK

New digital services go beyond traditional MDM to help you keep tabs on all devices at all times—to pre-empt device failure, boost worker productivity, and improve the health of your bottom line.
