## HOW TO CREATE A PROFESSIONAL HOMEWORKING ENVIRONMENT?

Work from home has been an inexorable upward trend, with [95% of the U.S. population under some form of lockdown](#) (305 million people). Lots of employers assure that work from home remains a part of "the new normal". Moreover, research by Kaspersky shows that almost half of the employees prefer to keep working from home after the pandemic.

Digital meeting solutions such as video calls are appreciated by home workers. Almost 40% of the respondents in the above-mentioned survey indicated that they would like to make more video calls for a work meeting in the future. But employees also noticed that remote meetings are not always efficient. Many of them felt more distracted and one of the limitations is the ambient noise. Kids, neighbors working in the garden, a meowing or barking pet.

And that's why personal collaboration becomes a justified point of attention for now because almost all the business benefits from a professional and collaborative home working environment. To achieve this, investments will have to be made in qualitative audio and video solutions.

Below are 6 tips recommended professionally that may benefit you to efficiently work from home.

## **TIP 1: CHOOSE AN EASY USING VIDEO CONFERENCING**

With frequent and huge communicating demand of both inside colleagues or outside customers, an easy using video conferencing software delivers convenience and efficiency for your daily working and communication. Both Microsoft Teams and Zoom are highly efficient platforms on the market, which are easy to use with one click to join the meeting. Moreover, functions like share and edit files make them more than a video tool, which actually allows you to collaboratively work with others.

## **TIP 2: USE A HEADSET WITH NOISE CANCELING**

Imagine you are on a call with a colleague or customer while the children are running around the room or watching the favorite series. And that's why you need a headset with the noise-canceling ideal at that important moment to better focus on the business. Take the Yealink WH6 series DECT wireless headset x UC Workstation as an example; it is an excellent solution for working from home. The headset eliminates background noise and allows you to maintain focus and work with flexibility. It works easily through a plug-and-play setup; you can connect your laptop or mobile via Bluetooth or a USB cable for immediate use. Integrating a full-duplex speakerphone, wireless mobile phone stand, 4-inch touch console, and a USB hub, it offers more possibility when working from home.

### **TIP 3: CALL FROM HOME WITH THE DEDICATED TELEPHONE FROM OFFICE**

Call the office from home with your landline. It's not just fun to use your business computer or laptop at home, but also your telephone from the office. It always turns out more often to be highly appreciated for the office landline telephone. You can use your device with the adapter from Yealink, which is also easy and convenient.

### **TIP 4: KEEP EASY VIDEO CONFERENCES FROM HOME**

Having a powerful video conferencing solution from home solves the problem caused by the restrictions of business travel or client visits. The Yealink UVC30 is a premium webcam with built-in a microphone and easy installation thanks to the tool, Yealink USB connection. The clip on the camera makes it easy on or below a screen. The 4K Ultra HD resolution with auto framing and 120 ° FOV ensure perfect display in every Microsoft Teams or Zoom meeting. With the strong performance of UVC30, you're able to enjoy true-to-life clarity of smooth communication.

## TIP 5: TAKE CONFERENCE CALLS AT HOME WITH A SPEAKERPHONE

Making conference calls with your mobile may be a hassle with poor quality sound, like hearing someone badly and or talking unclearly. A speakerphone is ideal to be understood under such a circumstance. The Yealink speakerphones CP900&700 are great for conference calls, which can be connected to broad UC platforms and are certified for Microsoft Teams. You can easily connect them to your laptop or computer via Bluetooth 4.0 or a USB cable. Both speakerphones have a perfect microphone with HD audio to deliver crystal clear communication!

## TIP 6: GET AN ALL-IN-ONE SOLUTION

Suffered from poor audio or image quality, you just got a disappointing experience. However, with the Yealink UVC30-CP900 BYOD Meeting Kit, you are both insured excellent audio and video quality in a time for efficient personal collaboration. The premium HD audio quality, echo cancellation, and 360 ° microphone range of the CP900 always kept you be understood even several meters away. And the UVC30 delivers premium 4K video and fluent communication for you. It's easy, convenient, and truly enhances your daily working experience.
