

The Future of Healthcare Demands More

Empowering Clinicians to Deliver Meaningful Care with Confidence

Running Epic Rover on Zebra devices helps clinicians work efficiently, reduce errors, and focus on what matters most—delivering safe, high-quality care with confidence and precision. The following Rover modules have been developed, tested, and deployed on Zebra Android devices up to Android 14: Inpatient, Beaker, Grand Central, Willow, and Dorthy & Comfort.

Barcode Medication Administration

Accurately verify the patient's identity and medication information at the bedside with Zebra devices and Rover.

Clinical Mobility

Zebra devices enabled with Rover enhance workflow efficiency and provide real-time access to critical information, enabling mobility and improved decision-making.

Dispense Tracking

Track patient medication dispenses with Zebra devices and Rover, to give nurses real-time visibility into medication status and location from the pharmacy to the patient floor.

Hospital Logistics

With Zebra devices and Rover, staff can seamlessly manage patient transport, scheduling, bed occupancy, and house keeping.

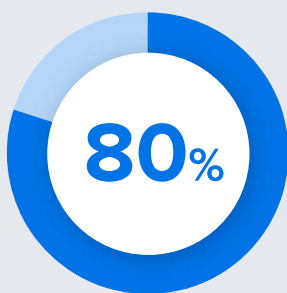

Lab Solutions

Zebra devices and Rover provide seamless integration into lab systems for end-to-end visibility, maintaining integrity and reducing human error for faster, more reliable results.

Home Health and Hospice

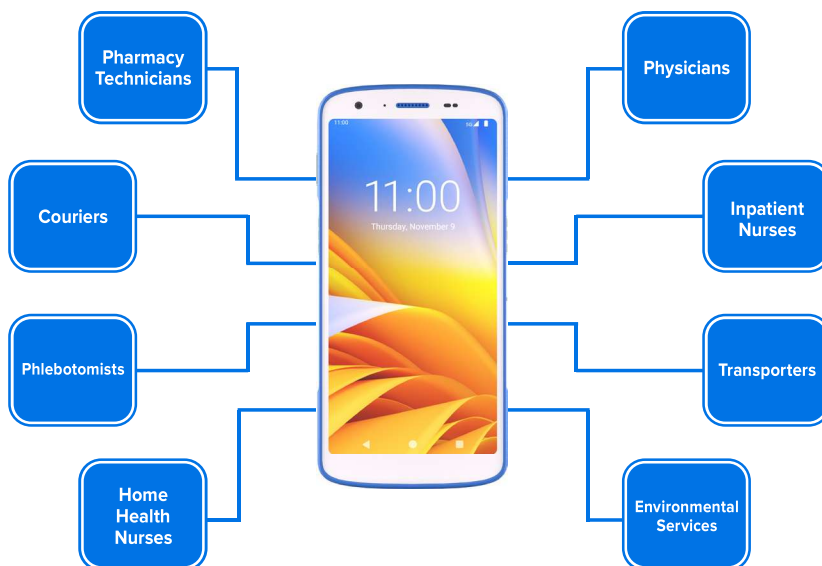

Empower mobile clinicians with Zebra devices and Rover to efficiently document simple home visits and care at the patient's home.

of clinicians agree patient care would improve with collaboration tools and healthcare applications.
