

# Scopia Control

## Control Your Scopia Room System

### The Easy Way to Join Meetings

Join a meeting from the integrated room calendar with a single click. Through the intuitive touch screen interface of the iPad™, place calls, access your corporate directory and previous calls with no instructions required.

### Control Your Scopia XT Series Room System or Telepresence Platform

Select video sources, control the PTZ camera, start the presentation and mute the Scopia room system microphone for privacy through the elegant iPad™ touch screen.

### Moderate Your Meeting

Easily invite other meeting participants from your corporate directory. Control your conference through the participants list, mute the microphone, stop the camera or even disconnect other attendees. Change the video layout and number of videos for each participant. Start or pause recording or streaming, lock the conference, extend the meeting time or end the entire conference.

### Receive Advanced Data Collaboration

View presentations, spreadsheets, documents and images shared in a video conference with H.239 interoperable data collaboration. Participants can immediately review previously shared materials and catch up if they arrived late to a meeting or spend additional time on critical points in material presented.

### Cost Effective

Scopia Control runs on the iPad™ leveraging its Multi-Touch™ user interface, large screen and high-quality graphics. Utilizing the iPad™ provides a cost effective control application that doesn't require an expensive, proprietary device.

## Meeting Initiation Features

### Calling

- Call by IP address, E.164, or SIP URI
- Call any user or any terminal from the directory
- Corporate directory access through a simple search based interface
- Recent calls for repeat dialing

### Integrated Conference Room Calendar
