# FLEXIDOME corner 7100i IR

## ENHANCING SAFETY AND SECURITY FOR FACILITIES

The FLEXIDOME corner 7100i IR camera from Bosch is ideal for correctional, healthcare, and public and social housing facility professionals. It helps them monitor enclosed spaces, like rooms, elevator cabs, and vestibules while respecting individual privacy. Its no-grip design supports a ligature-resistant environment, preventing the attachment of cords, ropes, or other materials to avert self-harm.

The corner-mounted camera has a wide field of view to help eliminate blind spots. A 6MP sensor provides forensic details for high-quality images even in low light. Intelligent IR is nearly invisible and prevents over exposure.

Its impact-resistant (IK10+ 50J) housing withstands brute force; a scratch-resistant bubble protects the lens. It prevents water ingress and corrosion (IK66) and withstands high-pressure washers during cleaning. The faceplate design stops the concealment of hazardous or illegal items. It pairs video with audio AI for detecting and classifying objects and loud, abnormal sounds, which helps security teams verify alarms and respond quickly to life-threatening situations.

### Robust and no-grip design

Corner-mount and anti-ligature (no grip) camera with IK10+ 50J (IK11) impact rating. Easy to replace accessories

### Excellent imaging

6MP sensor with HDR and invisible IR (940nm) captures forensic details. A wide-angle lens offers 131-degree horizontal and 96-degree vertical views without blind spots

### Built-in Artificial Intelligence (AI)

Most reliable detection and precise classification (both audio and video analytics)

### Premium performance and reliability

Alerts if problems or tampering occurs

### Trusted

Highest quality – backed by 5-year warranty. Highest level of data security. Secure by design, including optional fiber connectivity
