

EVOLVE**2**

It's not just new in every way.

It's the new standard.

Today's knowledge workers have got a lot on their plates. Business complexity increases all the time, while productivity is actually declining despite technology's advances over the past decade. On top of this, with more and more people now working in open offices, concentration and individual work is getting harder, with constant interruptions and noise appearing high on the list of pains for most knowledge workers.

And then there's the meetings... When you have more complex tasks to solve, you need more meetings. So collaboration is becoming more and more important, especially as so many now find themselves working as part of a geographically distributed team. And as teams change, offices and modes of working do too, with remote working set to rival office-based working by 2025.

Our vision

We set out to create a range of headsets that would help knowledge workers everywhere combat the common difficulties with modern working, from minimizing noise and interruptions, to making it easier than ever to connect and collaborate from anywhere.

Fueling productivity: For knowledge workers to be productive, they need the perfect balance of concentration, collaboration and flexibility. Evolve2 is engineered to fuel productivity under these key pillars.

Engineered for tomorrow: Although they're already better than the market leader, Evolve2 will actually improve over time with intelligent new software, analytics and features that mean the overall experience is constantly evolving.

Setting the new standard across the board

Our solution

We took our world-leading Evolve Series, and we re-engineered it.

We upgraded the concentration factor, with improved noise isolation and digital hybrid ANC, and a new busylight that's more visible than ever. We boosted collaboration by building in more microphones than any of our previous products, and developing new digital signal processing algorithms. And we improved flexibility with our longest ever battery life, an all-new casual design, and improved connectivity to all your devices. And all of this is possible thanks to our most advanced digital chipset ever, three times more powerful than its predecessor.

The Evolve2 range is a true game-changer, better and more powerful, and specifically designed for the modern knowledge worker - wherever they're working.

It's not just new in every way. It's the new standard.

Key features:

Designed for comfort, built to last. Soft memory foam ear cushions and steel-enforced headband and hinged.

Best-in-class noise cancellation. Powerful digital hybrid ANC and noise isolating design.*

Outstanding call quality. 10-microphone technology powered by our most advanced digital chipset ever.*

360° Busylight, visible from all angles

UC-certified and Microsoft Teams Open Office certified, with a dedicate Teams button for truly seamless communication*

Bigger speakers. Better sound. Boom. Powerful leak-tolerant 40mm speakers and the latest AAC codec for incredible audio experience.

Contemporary casual design, a discrete hidden boom arm and 2 color variants, so you can move seamlessly from the office to on-the-go*
