Healthcare in the age of technology

Outstanding technology solutions that keep patients and healthcare practitioners connected

l

An aging population coupled with a predicted **shortage of 15 million** healthcare professionals by 2035 is putting strain on the industry to be able to service the needs to the population¹

PROFESSIONAL AUDIO SOLUTIONS

Challenges with social distancing and the need to service rural locations is **accelerating** the rollout of telemedicine¹

63%

Survey's across the US, UK, France, Germany, Japan and China show that roughly 70% of those surveyed have used some form of telemedicine and **63%** of those who had used it found it was a good or excellent experience²

33%

Remote Healthcare is expected to grow by **33%** each year until 2025, with 46% of that market being represented by real-time virtual health¹
