

**SPEAK2 RANGE**

The next generation of professional speakerphones, engineered for hybrid working

Technology for life's new rhythm

**OUTSTANDING AUDIO QUALITY**

Forget everything you think you know about portable speakerphones. We're tearing up the rule book with the new Speak2 Range, featuring super-wideband audio\*, and advanced full-range speakers. This cutting-edge tech puts you front and center, unscrambling all of the possible frequencies in your voice's natural range. **It's a dramatically more powerful audio experience.**

**ADVANCED FULL DUPLEX AUDIO**

Some speakerphones don't allow both sides to speak and be heard at the same time, but we think conversations are better when they flow naturally. Speak2 is our first range of speakerphones to be specifically engineered for perfect full duplex audio, going way beyond standard speakerphone performance. **So your conversations can flow freely in both directions, just like they would in person.**

**UPGRADED MICROPHONE TECHNOLOGY**

The Speak2 Range features four of the most state-of-the-art beamforming microphones, more than ever in a Jabra speakerphone, and the very latest digital signal processing algorithms. This allows them to effortlessly harness every change in voice tone, to pick up every nuance (because it's not what you say, it's how you say it). Innovative noise reduction technology keeps background distractions at bay. **The result is an outstanding audio performance that's truly unmatched.**

**UNIQUE MICROPHONE QUALITY INDICATOR**

See at a glance how well you're being heard at all times, wherever you are in the room, with the only speakerphone on the market to feature a custom-designed Microphone Quality Indicator.\* Tap-activated via the Sound+ and Jabra Direct apps, this intuitive 360-degree light ring gives you a visual indication of when you're coming across loud and clear, and when you need to huddle in a little closer. **It's like having a personal voice coach in every meeting.\*\***

**ALL-NEW VOICE LEVEL NORMALIZATION**

We know how vital it is that everyone can be heard equally, so the new Speak2 Range is the first to be engineered with our latest cutting-edge Voice Level Normalization technology. That means you'll be heard whether you speak with quiet confidence or enthusiastic energy. **Now you can be yourself and speak in the way that's most natural for you.**

**PREMIUM PORTABLE DESIGN**

The iconic, much-loved 'puck' shape of the original Speak Series gets a serious makeover with Speak2. It's modern and minimal, with brushed aluminum detailing\* and premium custom-designed speaker fabric, engineered to deliver the most optimal audio experience. It's small and durable enough to throw into your bag, too. **Looks sleeker than ever. Performs better than ever.**

**ADDED DURABILITY**

We've made sure the Speak2 Range is built to handle anything a busy hybrid working day throws at it – from messy kitchens to deep work bags – with all-new IP64\*\*\*-rated protection from dust and water. **So you can use it anywhere, without worrying.**

**EASE OF USE & BATTERY LIFE**

Just plug-and-play and you're off faster than you can say "you're on mute". Go wireless with up to 32 hours of battery, and make setup even more of a snap with Microsoft Swift Pair and Google Fast Pair. **Your Speak2 is ready for anything.**

**FUTURE-PROOF**

Speak2 is the first range of speakerphones in its category to have both USB C and USB A connectors on the same cable, so you won't need to tear the office apart looking for an adapter, plus it'll work now, and when you get a new computer. And since we're givers, we'll also keep you ahead of the game with regular firmware updates via Jabra Direct and Xpress software. You can even customize your settings with the Sound+app.\* **Just think of it as your flexible friend.**

**SUSTAINABILITY**

To help take care of our planet, we consider sustainability carefully at every stage of product development. That's why the casing of Speak2 55 & 40 is made with over 50% sustainable materials\*\*\*\* and both devices feature a number of built-in parts that can be easily repaired or replaced. **Better sustainability = longer speaker life = great calls for you and your team for years to come.**

\*Speak2 75 only, Super-wideband audio experience requires UC client support, and device support

\*\*Initial activation is required via the Jabra Sound+ or Jabra Direct apps

\*\*\*Avoid exposing the USB cable or adapter plug to moisture or liquids and never charge or power up if the USB cable or adapter plug is wet or moist

\*\*\*\*Sustainable materials include post-consumer recycled, post-industrial recycled or bio-based materials

Features Speak2 75

## CERTIFICATIONS

The Speak2 Range is certified for all leading virtual meeting platforms, and optimizes the whole experience, for professional call quality every time. So whether you prefer to jump on Microsoft Teams, Google Meet or Zoom, you can rely on seamless plug-and-play connectivity and reliably brilliant meetings right from the get-go. **Now you can get together from anywhere.**

# Techie features explained

Understand our advanced technology inside out

## Super-Wideband Audio & full range speaker

(exclusive to Speak2 75)

A dramatically more powerful audio experience

**Super-wideband audio** captures a wider range of speech than ever before in a Jabra speakerphone, transmitting high quality, professional audio\* so users' voices - and their favorite songs - can be heard in crystal-clear detail.

This speakerphone might be small in size but it's BIG on sound - a **65mm full range speaker** covers the entire human vocal range, delivering crystal-clear sound quality to calls, and rich audio with deep bass for music.

\*when connected via USB.

## Beamforming Microphones

Upgraded microphone tech to filter speech from noise

'Beamforming' or special filtering microphones are designed to be more sensitive to sound coming from one or more specific directions than sounds coming from other directions **to better filter speech from other noise**. This provides better call clarity and speech transmission in any work environment.

## Advanced Full Duplex Audio

Natural conversations

This audio system is powered by the four state-of-the-art microphones and advanced algorithms to support overlapping speech and transmission of audio data in both directions **simultaneously**. Just like a telephone signal, there are two communication paths. One path receives audio data, while the other path transmits speech to the rest of the conference. This allows users to speak and be heard at the same time, without cutting off the speaker's sound, making conversations flow more naturally.

## Jabra-exclusive Microphone Quality Indicator

(exclusive to Speak2 75)

No more: "Can you hear me now?!"

A Microphone Quality Indicator with a 360-degree light ring\* gives the current speaker visual feedback on whether their voice is picked up - or not, how loud they sound, and which direction the speech is coming from. This unique Jabra feature will reduce the frustration of users not knowing whether they're being heard or doubtfully asking: "Can you hear me now?"

\*Initial activation is required via the Jabra Sound+ or Jabra Direct apps.

## All-new Voice Level Normalization

Speak the way that suits you

Even if someone speaks in ALL CAPS while their colleague lets out the tiniest of squeaks, they'll be received and heard at equal volume level. This helps to reduce sudden peaks in sound or the need to boost the volume when users go quiet. Now everyone can relax and speak comfortably, and still be heard clearly whatever their natural volume.

# Which Speak2 fits your customer needs?

You truly got all bases covered with the most premium meeting solutions for hybrid working.

Need the **richest experience** with Microsoft Teams Rooms and Zoom Rooms certifications?

**SPEAK2 75**

Our most premium wireless speakerphone across all features.
