

Extreme Platform ONE™

The One for All

Networking and security have become increasingly complex and difficult to manage. This complexity is caused by too many interfaces, difficult or near impossible integrations, siloed AI, data, and apps, and fragmented licensing. Extreme Platform ONE™ simplifies all of these issues.

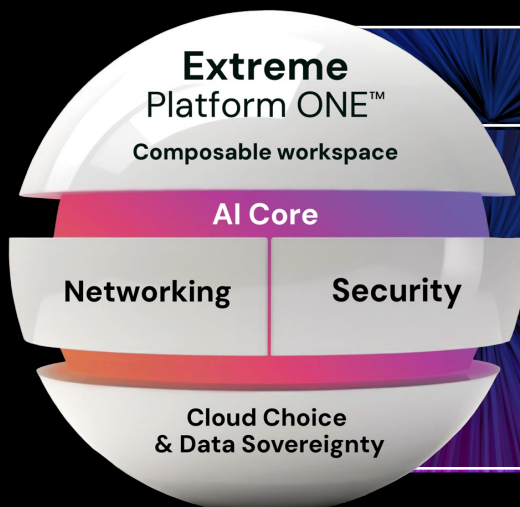

Extreme Platform ONE is the first AI-powered networking platform with integrated security and conversational, multimodal, and agentic AI. It combines capabilities for network and security operations along with business teams all in a single platform spanning the learn-plan-deliver-fix lifecycle.

Regain control, unlock innovation, and boost productivity through the AI-powered elements of Extreme Platform ONE:

- One easy-to-use integrated experience
- Built-in AI automation that boosts productivity, reducing many tasks from hours to minutes
- Centralized view showing all inventory, subscriptions, and contracts
- Simplified licensing that makes the solution as easy to buy as it is to use

Unique Capabilities

- **A real-time, composable workspace** unifies networking, security, and inventory management.
- **Consolidated, AI-intelligent management** of wired, wireless, and fabric devices truly unifies the networking estate.
- **Built-in AI that goes beyond mere remediation** to scale and automate connectivity with conversational, multimodal, and agentic AI.
- **Complete, zero trust access security** combines cloud-based network access control and ZTNA in a single policy engine with an easy-to-use interface.
- **Third-party device support** enables IT to discover, monitor, and manage Extreme and non-Extreme devices from a single interface.
- **Advanced inventory management** simplifies business team experiences across trial, purchase, renewal, and upgrade.
- **Simplified licensing** for network and inventory management, security, AI, and support services.
- **Industry-leading support** features include Service Agent and 24-7 in-sourced human global technical assistance.

Secure Connectivity Made Simple

Secure, scale, and automate connectivity with Extreme Platform ONE, the first all-in-one, AI-powered networking platform. Its complete zero trust access security and industry-leading support will empower your teams to go to new extremes.

Wireless Wired Fabric SD-WAN Ecosystem

Extreme Platform ONE: Secure Connectivity Made Simple

Only Extreme Platform ONE delivers a unified experience, automation enhanced with built-in-AI, and radically simplified licensing that organizations need to regain control, unlock innovation, and boost productivity.

Extreme Platform ONE subscriptions include 24-7 access to 100% in-house global technical support experts.

Done in ONE: Integrated Experience with a Composable Workspace

An intuitive, integrated experience is a key design principle of Extreme Platform ONE. Its real-time, composable workspace unifies networking, security, and inventory management for NetOps, SecOps, and business teams.

- Unified management for wired, wireless, fabric, SD-WAN, and security in one experience
- Zero trust application and network access security from one policy engine including native cloud PKI services
- Multilayered network visualizations including fabric, physical, virtual, RF map, and service
- Extreme Third-Party Management Engine (TPME) enables IT teams to discover, monitor, and manage Extreme and third-party devices cohesively using Extreme Platform ONE

AI Your Way: Built-in AI Automates Hours into Minutes

Extreme AI goes beyond remediation to address a broader set of use cases spanning the entire learn-plan-deliver-fix lifecycle across Extreme's networking and security services. Extreme Platform ONE's built-in AI contributes to all aspects of network operations:

- Custom multimodal AI dashboards and autonomous agents with human-in-the-loop enhanced trust
- Think It Through feature delivers advanced reasoning and perspective through conversational AI
- Service Agent provides a smart, AI-powered 24-7 point of contact that automates GTAC case creation
- AI-assisted workflows for design, configuration, troubleshooting, and migration
- Interactive tables, charts, and graphs in personalized reports and dashboards

Radically Simplified Licensing: As Easy to Buy as It Is to Use

Extreme Platform ONE's radically simplified licensing includes network management, security, AI, and industry-recognized support services, along with:

- Advanced inventory management across trial, purchase, renewal, and upgrade
- AI-assisted workflows for assets, subscriptions, licensing, and contracting
- Easy-to-use financial reporting and forecasting with interactive AI analytics, dashboards, and agents

Summary

Networks and security are increasingly complex. Data, apps, and AI are siloed. Extreme Platform ONE's automation—enhanced by built-in AI—helps networking, security, and business teams achieve more, faster, and with less effort as they work together to manage, secure, and scale the network. Simplified licensing, inclusive of Extreme's industry-recognized support services, makes Extreme Platform ONE as easy to buy and renew as it is to use.
