PDC: Your Partner for System-Wide Certainty

The PDC Legacy: 70 Years of Clinical Innovation

Since 1956, hospitals have pressure-tested PDC media and hardware. Today, over 90% of US hospitals trust us, and three out of four infants receive a PDC wristband at birth.

Our Connected Care identification portfolio is the physical-to-digital thread that links patients, specimens, and medications to EHRs. From admissions to discharge, PDC keeps clinicians connected to what matters most: patient care.

Admission-to-Discharge Advantages

Health Systems Need

EHR Compatibility

The PDC Difference

Efficient Deployment

EHR-ready hardware and medical-grade media provide interoperability – no go-live surprises.

- The Certis® C1-30 Printer and App scale media templates to existing scripts instantly.

Technical Agility

Flexible Platform

Our open JavaScript platform allows for rapid, custom scripting.

- Repurpose scanners, multitask with one device, or force workflows – no waiting for paid, tiered-priority firmware builds.

Support Velocity

Factory-Direct Connection

Bypass generic call centers for PDC's US-based experts and field application engineers.

- Our teams in Salt Lake City, UT and Manheim, PA only focus on healthcare challenges and EHR-specific workflows.

System Affordability

Cost Control

Purpose-built hardware and medical-grade IDs reduce replacements.

- Fewer reimbursement issues tied to ID errors – lowering risk and the total cost of ownership.

Clinical Durability

Mission-Critical Reliability

Scanners' CodeShield® Plastic withstands disinfection. Certis® Printers are built for demanding clinical settings.

- Reduced RMAs, greater value, and higher customer satisfaction.
