SR30/SR31T - Linear Imager

SR30 and SR31T linear imager customers should migrate towards the **Voyager 1450g1D**

The Voyager 1450g1D delivers omnidirectional reading of linear bar codes, plus the ability to affordably upgrade the device to enable PDF and 2D bar code scanning—either at the time of purchase, or as data capture needs evolve.

SR30/SR31T - 2D Imager

SR30 and SR31T 2D imager customers should migrate towards the **Voyager 1450g2D**.

For those who only need the ability to read linear and 2D bar codes, the Voyager 1450g2D is the perfect fit. It doesn't include additional area-imaging features such as advanced image capture and processing applications; allowing Honeywell to keep costs down while offering aggressive linear and 2D scanning at an attractive price.

SR31T - Healthcare Area Imager

SR31T healthcare customers should migrate towards the **Xenon 1900h**

Xenon 1900h healthcare scanner is well-suited for a wide variety of applications that require the versatility of area-imaging technology. The scanner can be managed with other scanners within the networks from one location, making it ideal for IT managers in a healthcare setting. Resistant to harsh chemicals, the Xenon 1900h improves scanning and provides increased supply chain stability.
