NCR KEYBOARD FAMILY

Programmable, reliable, and stylish

The 64-key compact keyboard is ideal for retailers requiring a POS matrix layout, a scanner port, and programmable keys. The 115-key full size and the 105-key compact alpha feature a QWERTY layout, programmable function keys, and an optional glide pad to save valuable counter space. All of the keyboards support an optional 4-position key lock to control access and a 3-track ISO magnetic stripe reader (MSR).

Consistency you can count on

To ensure the highest quality and reliability, NCR keyboards undergo comprehensive environmental and compatibility testing and are manufactured under strict standards. NCR places great emphasis on ensuring our keyboard components remain consistent over time to support the longer lifecycles that retailers need and to maximize your investment.

Purpose-built for retail

NCR keyboards were developed specifically to meet the demands of a variety of retail environments and to protect against damage from objects such as paper clips, staples and pins that may fall between the keys and damage the electronics of the keyboard. This improves overall reliability and is not typically available in standard PC keyboards. Our keyboards work as hard as your associates and are designed for years of continual usage.

Industry-standard connectivity

NCR Keyboards support the latest OPOS and JavaPOS standards. Whether you're using a Windows® or a Linux operating system (OS), the industry-standard peripheral drivers enable you to support the application and operating system of your choice.

For more information, visit ncr.com, or email retail@ncr.com.

KEY FEATURES

- Extensive configuration flexibility
- Programmable and re-legendable keys to save time and reduce training
- Purpose-built for retail environments
