### Compact All-in-One Solution

#### Integrated Display with Modular MSR, Printer

The HS3510 is an all-in-one compact POS terminal solution, which has a tiny 6" x 6" base footprint that allows every inch of valuable counter space to be used. The fan-free HS3510 is ideal for small or medium sized retail and hospitality POS, or a self service kiosk. Its innovative modular design greatly enhances ease of maintenance and maximizes terminal uptime.

HS3510's integrated design with modular serviceability address the industry's most common mechanical points of failure – printer and MSR. In the rare event of a mechanical component failure from HS3510's otherwise solid state design, a replacement module can be installed in minutes with the removal of a few screws and cables. It is that simple. This innovative modular printer design greatly enhances ease of maintenance and maximizes terminal uptime.
