# Drive-Thru Handle

The FlexiPole™ Drive-Thru Handle enables cashiers at Drive-thru retail outlets to conveniently hand a payment device to a customer in their vehicle. At 42cm long and only 225g in weight, the Drive-Thru Handle is the ideal way to present your payment technology to drivers as they come to your drive-thru window.

## Accessibility

The FlexiPole™ Drive-Thru Handle helps eliminate payment terminal risks such as cable damage, dropping and theft by keeping the cashier firmly in touch with the payment device while presenting it conveniently to the customer in their vehicle. Once the transaction is complete, the Drive-Thru Handle can be stored neatly on the wall mounted holster ready for the next transaction.

## Security

FlexiPole™ systems provide a secure solution with the use of the tailored backplate that prevents access to the rear of the card payment machine. The Drive-Thru Handle utilises a secure latching mechanism that makes stealing or tampering with the machine extremely challenging.

Additional security is provided when purchased with the Wall Mount Kit (available separately) into which is built a tough tether anchor point that can be used with any tether to attach to your payment device.

## Adaptability

FlexiPole™ systems provide adaptability with the creation of our individually tailored backplates for your device, which allows a quick change if you need to switch your device type.

## PRODUCT SPECIFICATIONS

### Product Code:

Handle ASSD0121  
Wall Mount CST00159

### Weight:

Handle 255g  
Wall Mount 118g

### Length:

Handle 42cm  
Wall Mount 16.2cm

### Material:

ABS
