

WHAT ARE THE MC2200/MC2700 MOBILE COMPUTERS?

'No compromise' cost-effective mobility for small and medium businesses

When it comes to empowering workers in small and medium-sized businesses, the MC2200/MC2700 shines. Connect practically any worker, anywhere with the WiFi/cellular data (MC2700) and WiFi only (MC2200) models. These devices set the bar for comfort — in addition to unparalleled ergonomics, they are 20% lighter than many competitive devices. The right level of ruggedness delivers dependable operation. The integrated touchscreen and keypad support today's 'green screen' TE apps, and tomorrow's interactive Android touchscreen apps. And Mobility DNA tools make your devices easier to use, manage and secure. The MC2200/MC2700 mobile computers — the right hardware and software features, the right ruggedness and advanced ergonomics — all for the right price.

WHY SHOULD YOU BUY THE MC2200/MC2700?

TOP 5 CUSTOMER BENEFITS

1

The one device that goes everywhere.

Inside your facility — even if you don't have a WiFi network, or coverage is spotty. Expansive outdoor areas like yards and ports, where WiFi can be too expensive to deploy and maintain. Technicians repairing equipment out in the field. Drivers delivering packages. No matter where your workers are, with your choice of the MC2700 WiFi/cellular data model or the MC2200 WiFi only model, you can give your workers mobile access to the data they need to get the job done right — and faster.

2

Unbelievable ergonomics.

The MC2200/MC2700 mobile computers are the only devices in their class that are loaded with design differences that your workers will feel. Start with the weight — it's engineered to be one of the lightest devices in its class, and is 20% lighter than many competitive devices. Zebra's award winning industrial design team touched just about every aspect of the device and trigger handle to make it easy to hold, easy to find keys by feel, easy one-handed operation — whether workers are entering data on the keypad or touchscreen, and more.

3

A platform for success.

When you choose the MC2200/MC2700 mobile computers, you choose devices with Zebra's 'ultimate series' platform — a platform that includes one of today's most advanced processors and the most advanced version of Android. The result is desktop-like performance on virtually every application — no time wasted waiting for screens to load. And with power-conserving technologies at work, the standard battery powers two full shifts, and the extended battery powers nearly three full shifts.

4

Get more out of your devices right out of the box with Mobility DNA Professional — only from Zebra.

Complimentary ready-to-use tools make your devices easier to use, secure and manage, right out of the box. Stage your devices with all the right apps and settings with a scan of a barcode or tap on an NFC tag. Scan and send barcode data right to your existing apps with DataWedge — no programming or app changes required. Choose the features and apps you want your workers to access with Enterprise Home Screen. And more.

5

But wait, there's more. More great options, more device value.

Take productivity, device security and deployment simplicity to the next level with the advanced tools in the Mobility DNA Enterprise License. Customize your license by adding one of two tools at a discount: run TE green screen apps with Zebra Terminal Emulation Lite™ — or create web-based apps that integrate all the features in your MC2200/MC2700 devices with Enterprise Browser. And one of the most comprehensive accessory families has something for everyone, from accessories for users for easy carrying and IT for cost-effective backroom buildout.

APPLICATIONS

Outside or in the field

- Yards/ports
- Field service
- Postal and courier

On premise

- Warehousing/distribution
- Manufacturing
- Retail (front and back of store)

ROI

- Simplify management and support by standardizing on one device that spans multiple applications and use cases
- Improve staff productivity
- Improve task accuracy
- Improve overall operational efficiency
- Better customer service
- Advanced ergonomics, lightweight design and ease-of-use reduce training time/cost and minimize turnover, leading to a more experienced and knowledgeable workforce
