

## Zebra Mobility Total Benefits of Ownership

### Liability or Reliability?

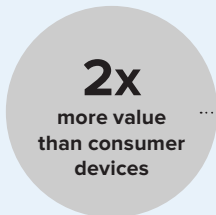

#### Make the right call with Zebra Mobility Total Benefits of Ownership

Clinical mobility is transforming healthcare, but consumer smartphone devices aren't made to function in a healthcare environment. Choosing a technology that's not purpose-built for the rigors of healthcare isn't just costly - it's potentially dangerous.

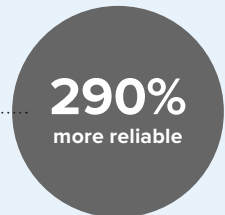

Zebra's enterprise devices give you the simplicity of Android with all the mobile computing, clinical collaboration, and data capture features your staff needs to provide every patient with the highest quality care.

Get the most value while prioritizing patient care with:

Consumer devices have an average total cost of ownership that is more than twice as high as Zebra handheld mobile devices over a 5-year period.

Zebra handheld mobile perform 2.9X better than consumer devices. Zebra devices' reliability avoids potentially dangerous workarounds that can lead to medical errors.

Zebra handheld mobile devices last up to 10 years, while consumer devices only last up to 3 years.

Zebra handheld mobile devices feature a battery that lasts up to 14 hours and are designed to last an entire shift without recharging.

## Protecting your patients, staff and organization

### Infection control

Zebra handheld mobile devices are made with medical grade plastics that can help reduce the spread of healthcare-related infections.

### Reduce downtime

Consumer devices are prone to damage and downtime. Zebra handheld mobile devices are reliable and durable so your care givers can stay connected to the information they need.

### Data security

Keep your patient's data secure with encryptions and application permissions to prevent unauthorized users.

### Communicate with other staff members

Share updates and information with Push-to-talk VoIP and secure text messaging with Workforce Connect and WorryFree WiFi.

### Software certifications

Ensure your organization is in compliance with all privacy and HIPPA regulations.

### Easy IT management

Consumer devices are a minefield for IT to monitor, manage and secure. The TC52-HC increases IT control and visibility with Mobility DNA software tools.

## The TC52-HC Touch Computer: Everything healthcare workers want, everything your healthcare facility needs

### Infection control

- Disinfectant-ready medical grade plastic
- Reduces the spread of healthcare-related infections
- Superior infection control for better patient safety
